

NAOMI MOHLALA

Junior Software Developer | Full-Stack Web Developer

Johannesburg, South Africa | +27 62 412 9607 | naomimohlala2@gmail.com | github.com/NaomiMohlala | linkedin.com/in/naomi-mohlala

PROFESSIONAL SUMMARY

Motivated and results-driven Junior Software Developer with a Diploma in Information Technology (Software Development) from Rosebank College International. Passionate about crafting responsive, user-centric full-stack web applications using modern technologies including HTML5, CSS3, JavaScript (ES6+), Node.js, Express.js, and MySQL. Proven ability to independently conceive, develop, and deploy production-ready projects from scratch, including a full-stack Job Application Tracker with a REST API and MySQL backend, and an interactive Job Market Dashboard with Chart.js data visualizations. Strong problem-solving skills, keen attention to detail, and a growth mindset with a commitment to continuous learning. Currently expanding expertise in React.js and Tailwind CSS. Actively seeking junior developer, graduate developer, or software engineering internship opportunities in Johannesburg or remote environments.

TECHNICAL SKILLS

Frontend:	HTML5, CSS3, JavaScript (ES6+), Responsive Web Design, CSS Grid, Flexbox, DOM Manipulation
Backend:	Node.js, Express.js, RESTful API Development, Middleware, Server-side JavaScript
Database:	MySQL, SQL (DDL/DML), Relational Database Design, localStorage, JSON
Visualization:	Chart.js - Bar Charts, Line Charts, Doughnut Charts, KPI Dashboards
Version Control:	Git, GitHub, GitHub Pages, Repository Management, Branching
Dev Tools:	VS Code, Live Server, npm, Node Package Manager, Command Line
Soft Skills:	Problem Solving, Debugging, Analytical Thinking, Self-directed Learning, Attention to Detail
Learning:	React.js, Tailwind CSS, JWT Authentication, TypeScript

PROJECTS

Job Application Tracker - Full-Stack Web Application

Live: naomimohlala.github.io/job-application-tracker | Code: github.com/NaomiMohlala/job-application-tracker

- Architected and built a complete full-stack CRUD web application to manage job applications end-to-end
- Engineered a RESTful API with 4 endpoints (GET, POST, PUT, DELETE) using Node.js and Express.js
- Integrated MySQL relational database for persistent, structured data storage with proper schema design
- Built dynamic frontend with JavaScript DOM manipulation rendering application data in real time
- Designed professional UI with color-coded status badges: Applied, Interview, Offer, Rejected
- Created a live statistics dashboard: total applications, interview rate, offer rate, pending count

- Implemented localStorage fallback for offline persistence ensuring zero data loss on page refresh
- Achieved full cross-browser compatibility and responsive layout for desktop and mobile screens
- Tech Stack: HTML5, CSS3, JavaScript (ES6+), Node.js, Express.js, MySQL, Git, GitHub

Job Market Dashboard - Interactive Data Visualization Dashboard

Live: naomimohlala.github.io/job-market-dashboard | Code: github.com/NaoimiMohlala/job-market-dashboard

- Designed and built an interactive dashboard to visualize and analyze job search activity and performance metrics
- Implemented three chart types using Chart.js: doughnut chart, bar chart for monthly trends, line chart for cumulative activity
- Displayed four real-time KPIs: total applications, interview conversion rate, offer rate, and pending applications
- Integrated seamlessly with Job Application Tracker via shared localStorage for cross-app data flow
- Applied mobile-first responsive design using CSS Grid and Flexbox - fully functional on all screen sizes
- Used advanced JavaScript ES6+ features: arrow functions, spread operator, array methods (filter, map, sort)
- Tech Stack: HTML5, CSS3, JavaScript (ES6+), Chart.js, Git, GitHub Pages

EDUCATION

Diploma in Information Technology (Software Development)

Rosebank College International | Johannesburg, South Africa | Graduated: 2022

Relevant Coursework: Software Development Principles, Web Development, Relational Database Management, Object-Oriented Programming, Systems Analysis and Design, Programming Fundamentals, Network Infrastructure, IT Project Management

CERTIFICATIONS

- Microsoft Excel - Alison Online Learning Platform (Certificate of Completion)
- Continuous self-directed learning in JavaScript, Node.js, MySQL, and React.js through practical project-based work

ADDITIONAL INFORMATION

- Immediately available for junior developer, graduate developer, and software engineering internship roles
- Open to remote, hybrid, and on-site positions in Johannesburg, Gauteng, and surrounding areas
- Independently designed and delivered two deployed full-stack projects without formal workplace guidance
- Proven ability to learn new technologies quickly - built a full REST API with MySQL in days
- Strong written and verbal communication skills with ability to explain technical concepts clearly
- Committed to clean code principles, maintainability, and software development best practices
