

NAOMI MOHLALA

Junior Software Developer | Full-Stack Web Developer

Johannesburg, South Africa | +27 62 412 9607 | naomimohlala2@gmail.com | github.com/NaoimiMohlala | linkedin.com/in/naomi-mohlala

PROFESSIONAL SUMMARY

Motivated and results-driven Junior Software Developer with a Diploma in Information Technology (Software Development) from Rosebank College International. Skilled in building responsive, user-centric full-stack web applications using React.js, JavaScript (ES6+), Node.js, Express.js, and MySQL. Proven ability to independently conceive, develop, and deploy production-ready projects from scratch, including a React-based e-commerce platform, a full-stack Job Application Tracker with a REST API and MySQL backend, and an interactive Job Market Dashboard with Chart.js data visualizations. Strong problem-solving skills, keen attention to detail, and a growth mindset with a commitment to continuous learning. Actively seeking junior developer, graduate developer, or software engineering internship opportunities in Johannesburg or remote environments.

TECHNICAL SKILLS

Frontend:	React.js, HTML5, CSS3, JavaScript (ES6+), Responsive Web Design, CSS Grid, Flexbox
React Ecosystem:	Components, Hooks, React Router, Context API / State Management, Client-side Routing
Backend:	Node.js, Express.js, RESTful API Development, Middleware, Server-side JavaScript
Database:	MySQL, SQL (DDL/DML), Relational Database Design, localStorage, JSON
Visualization:	Chart.js - Bar, Line, Doughnut Charts, KPI Dashboards
Deployment:	Vercel, GitHub Pages, Git, GitHub, CI/CD basics
Dev Tools:	VS Code, Live Server, npm, Node Package Manager, Command Line
Soft Skills:	Problem Solving, Debugging, Analytical Thinking, Self-directed Learning

PROJECTS

Karoo Ember - React E-Commerce Platform

Live: karoo-ember.vercel.app | Built with React.js

- Built a full e-commerce web application for a coffee bean retailer using React.js
- Implemented shopping cart functionality with add, remove, and quantity management
- Built client-side routing with React Router for seamless multi-page navigation
- Used React state management (Context API) to manage cart and product data across components
- Implemented product filtering and dynamic product listing pages
- Made API calls to fetch and display product data dynamically
- Designed fully responsive UI optimized for mobile and desktop shopping experiences
- Deployed live to production using Vercel with continuous deployment from GitHub
- Tech Stack: React.js, JavaScript (ES6+), React Router, Context API, CSS3, Vercel

Job Application Tracker - Full-Stack Web Application

Live: naomimohlala.github.io/job-application-tracker | Code: github.com/NaoimiMohlala/job-application-tracker

- Architected a complete full-stack CRUD web application to manage job applications end-to-end

- Engineered a RESTful API with 4 endpoints (GET, POST, PUT, DELETE) using Node.js and Express.js
- Integrated MySQL relational database for persistent, structured data storage
- Designed professional UI with color-coded status badges and a live statistics dashboard
- Tech Stack: HTML5, CSS3, JavaScript (ES6+), Node.js, Express.js, MySQL, Git, GitHub

Job Market Dashboard - Interactive Data Visualization Dashboard

Live: naomimohlala.github.io/job-market-dashboard | Code: github.com/NaoimiMohlala/job-market-dashboard

- Built an interactive dashboard visualizing job search activity using three Chart.js chart types
- Displayed real-time KPIs: total applications, interview rate, offer rate, and pending count
- Tech Stack: HTML5, CSS3, JavaScript (ES6+), Chart.js, Git, GitHub Pages

EDUCATION

Diploma in Information Technology (Software Development)

Rosebank College International | Johannesburg, South Africa | Graduated: 2022

Relevant Coursework: Software Development Principles, Web Development, Relational Database Management, Object-Oriented Programming, Systems Analysis and Design, Programming Fundamentals

CERTIFICATIONS

- Microsoft Excel - Alison Online Learning Platform (Certificate of Completion)
- Continuous self-directed learning in React.js, JavaScript, Node.js, and MySQL through practical project-based work

ADDITIONAL INFORMATION

- Immediately available for junior developer, graduate developer, and software engineering internship roles
- Open to remote, hybrid, and on-site positions in Johannesburg, Gauteng, and surrounding areas
- Independently designed and delivered three deployed projects spanning React, Node.js, and data visualization
- Proven ability to learn new technologies quickly - went from no React knowledge to a deployed e-commerce app
- Committed to clean code principles, maintainability, and software development best practices
